PRODUCT DATA SPECIFICATION

Why not make a statement with this popular, multi-functional seating family?

Materials

The one-piece, perforated seat shells are produced from injection moulded Acrylonitrile Butadiene Styrene (ABS) & Styrene Acrylonitrile (SAN) copolymers. These are offered in a transparent and coloured, two tone, high-gloss finish, ranging in thickness from 10 – 13mm.

Frames are produced in either 11mm solid steel rod, 16mm circular steel hollow section or in various hardwood finishes.

Steel frames are finished with a chrome plating whilst hardwood frames have a coloured or clear lacquer finish.

Considerations

- Available in a selection of two-tone shell colours
- Available with a selection of frame styles.
- Options of two bar stool heights
