

GRESHAM

# EGIS SERIES TWO

PRODUCT DATA SPECIFICATION

GRESHAM

# EGIS SERIES TWO

## PRODUCT DATA SPECIFICATION

This chair features a single-piece laminated seat and back shell with corresponding laminated frame.

### Materials

Seat and back shell, and frames are produced in profiled laminated plywood that have a lacquer finish for wipe-down durability.

When seats are upholstered, a separate 'V-Board' panel is covered with moulded CMHR (Combustion Modified High Resilience) Polyurethane foam for comfort and compliance with flammability requirements for contract use. These are then covered with fabric and securely fixed to the chair seats.

Fabrics for seat panels are available in a wide selection of patterns, colours & weaves, suitable for contract use in public areas.

### Considerations

- Available in two wood finishes.
- Optional seat upholstery.
- The natural 'spring' of the shell provides additional seating comfort
