

GRESHAM

LOTUS

PRODUCT DATA SPECIFICATION

LOTUS

PRODUCT DATA SPECIFICATION

Sweeping forms and uncluttered lines make the Lotus family of seating an easy winner.

Materials

Seat shells are produced in profiled laminated plywood that have a paint and lacquer finish for wipe-down durability.

Frames are produced in various steel hollow sections that are hydro-formed, bent and then welded together to form a robust yet elegant structure.

Stools have a foot ring providing a useful rest for users as well as offering additional strength to the taller frames.

Frames are offered in either an epoxy powder coated or chrome plated finish

Considerations

- Available in two seat colours
- Available in two frame finishes.
- Available with or without arms
- Available in chair and two stool heights.
- Easy to clean.
