

GRESHAM

LG30

PRODUCT DATA SPECIFICATION

GRESHAM

LG30

PRODUCT DATA SPECIFICATION

The LG30 classically suits virtually any interior with lacquered wooden legs to create a simple, clean silhouette.

Materials

The seat and back are formed from laminated plywood that has pre-fitted 't-nuts' to locate fixings. These panels are covered with varying grades of CMHR foam to provide user comfort and then finished in a selection of upholstery grade fabrics.

The seat and back shells are supported by a fully welded, tubular steel frame which is also connected to the four, turned solid wood (Ash) legs. Metalwork is epoxy powder coated for durability whilst the legs have a lacquer finish.

Considerations

- Light weight for ease of movement
- Generous seat cushion and high back for sustained comfort
- Can be specified with two-tone upholstery
- Suitable for contract use as well as 'life-style' environments

Technical Details

Model	LG30A
OA Height	850
OA Width	585
OA Depth	605
Seat Height	470
Seat Width	490
Seat Depth	490
Net Weight	10.05kg

End Of Life Considerations

LG30 is designed for contract use, re-use and is 100% recyclable, diverting waste from landfill.

Material Breakdown

- Laminated Plywood - 4.31Kg
- Solid Wood (Ash) - 1.71Kg
- Steel - 2.24Kg
- CMHR Polyurethane Foam - 0.92Kg
- Fabric - 0.86Kg. (Based 100% recycled Polyester)
- Polypropylene - 3g (Trace)
