

Mesa  
Bench System

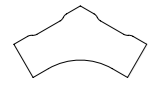

## Mesa

Mesa is a stripped-back bench desking range that combines strength with ease of assembly and use.

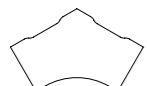

It is available in a concise selection of popular footprints, allowing specifiers to confidently plan their work space.

Its simple structure and shared componentry makes Mesa the ideal cost-effective desking solution for linear clusters.

## Mesa

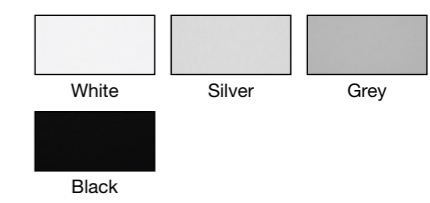

Mesa workstations can easily be accessorised with desk-mounted screens, complementary cable control and personal storage units available from Gresham's extensive portfolio.

Ample scoop cut-outs to the rear of the worksurfaces also allow equipment such as flat screen monitor arms or service modules to be clamped into place - making this simple system fully functional.
