

GRESHAM

# MIRAGE LITE

PRODUCT DATA SPECIFICATION

GRESHAM

# MIRAGE LITE

## PRODUCT DATA SPECIFICATION

Mirage Lite are a range of robust desktop screens.

### Materials

The substrate of the screens is produced from Medium Density Fibre Board which is laminated together using water-based adhesives. The resultant panel is machined to accept the support brackets that can be used to connect the screens to desk or table worksurfaces.

The panels are upholstered in a selection of fabric for choice. Each standard fabric complies with flammability requirements for contract use.

Support brackets are produced in die-cast aluminium or mild steel and are coated with a durable epoxy powder coating that can be colour matched to the metal framework of the adjacent desks the screens are used on.

### Considerations

- Selection of upholstery colours available
- Simple clamping brackets supplied fitting to most standard Gresham desks. (Requires Allen Key.)
- Other bracket types available.
- Choice of bracket colours
- Available in a range of sizes to suit desk dimensions
- Can be fitted locally – i.e. smaller screens fitted to longer desks
- Available in a selection of profile shapes
