PRODUCT DATA SPECIFICATION

GRESHAM

TIROS

PRODUCT DATA SPECIFICATION

The perfect balance of form and function, our Tiros seating collection combines comfort with practicality.

Materials

Seat

The seat consists of a ply body, entirely molded in cold foamed polyurethane (non-deformable cold cure moulded polyurethane foam. Average density: 60 kg/cubic metre).

Supplied with separate cushions available in a different fabric.

Frame

Fully welded metal frame surrounds available in a variety of colours. Available in 1 seat & 2 seat configurations with the option of a low back or a high back, all configurations come with a laptop table tray attached to the metal frame in a variety of MFC finishes.

- TIR1LB 1 Seat Configuration with Low Back.
- TIR1HB 1 Seat Configuration with High Back.
- TIR2LB 2 Seat Configuration with Low Back.
- TIR2HB 2 Seat Configuration with High Back.

Fabric:

All product models are available in a wide variety of fabrics. Please see fabric manufactures information for further details.

Considerations

- Two tone fabric available.
