PRODUCT DATA SPECIFICATION

GRESHAM

LC18 WOOD

PRODUCT DATA SPECIFICATION

The LC18 stool is designed to suit all interior needs. Its ergonomic foam padded seat provides maximum comfort.

Materials

The LC18 seat has a MDF seat board that is pre-fitted with steel 'T-Nuts' providing mounting points for the frame. This is over-moulded in cold-cured Polyurethane foam (65 Kg/m³ - 4,05 lb/ft³), that gives it both its distinctive style and comfort. The seat can be then upholstered in a selection of fabrics, each with their own material breakdown and properties.

A die-cast Aluminium adaptor plate is used to connect the seat shell to the fabricated wooden legs.

Wooden leg frames are produced from hardwood. These have a clear lacquer finish.

Footrest ring produced in Ø11mm solid steel and fixed into place with screws. This assembly has a chrome-plated finish.

Considerations

- Light weight for ease of movement
- Choice of upholstery fabrics
- Choice of wood finishes.
- Available in two heights to suit kitchen and lounge bars.
- Suitable for contract environments such as restaurants and cafes.
- Suitable for in-door use
