

GRESHAM

LS24

PRODUCT DATA SPECIFICATION

GRESHAM

# LS24

## PRODUCT DATA SPECIFICATION

The LS24 family offers a selection of modules that can be specified to organically maximise the use of the available space.

### Materials

The framework is produced from a combination of hardwood and softwood timber, along with other wood-based sheet materials. This combines strength with stability whilst allowing smooth ergonomic forms.

The frame is covered with CMHR (Combustion Modified High Resilience) Polyurethane foam for comfort and compliance with flammability requirements for contract use.

Upholstery fabrics for seat and back pads are available in a wide selection of patterns, colours & weaves, suitable for contract use in public areas.

### Considerations

- Deep seat cushions & generous upholstery
- Smooth upholstery lines promote longevity of use & reduce ware.
- Choice of leg finishes
- Choice of rectangular and curved modules
