

GRESHAM

METRIC PLUS

PRODUCT DATA SPECIFICATION

GRESHAM

METRIC PLUS

PRODUCT DATA SPECIFICATION

Metric Plus is the perfect mix of comfort and elegance.

Materials

Seat shells are produced in Polypropylene, combining flexibility with strength and durability.

These are covered with CMHR (Combustion Modified High Resilience) flexible Polyurethane foam for comfort and compliance to flammability requirements. The assemblies are then upholstered in fabric which is available in a wide selection of colours, patterns and weaves. Seats have a bottom pan produced in Polypropylene that covers the edges of the upholstery.

Backs are offered in either a soft Polyester mesh encapsulated within a framework or in a solid panel finish. Both panels and frames are produced in Polypropylene.

Structural elements, such as frames are manufactured in steel. These are produced from tubular sections and finished in chrome plating. Arm pads are moulded in Polypropylene.

Swivel models utilise a glass-filled Polyamide (Nylon) base with a steel gas column and mechanism.

Considerations

- Stacking (except swivel base options)
- Choice of four-legged, cantilever or swivel frames.
