# MIRAGE PODS

## AN OASIS OF CALM

The Mirage family of acoustic pods has been introduced to meet the demands of modern adaptable workspaces. Their ability to create free standing structures enclosing new spaces within existing environments frees specifiers from the constraints of their buildings whilst Mirage's diversity adds greater flexibility of use for constantly evolving environments.

# An Oasis

## INTRODUCTION

Workspace design has evolved over the decades to meet the changing demands of the workplace and the needs of the people who work in them.

Today, the very best contemporary workspaces are designed to provide not only functional efficiency, but be responsive to the needs of employees in terms of enhancing productivity and promoting personal wellbeing. Smart lateral thinking is required to create a multi-purpose environment that successfully achieves these goals, all within one singular space.

Able to transform chaotic open plan spaces into an oasis of calm, where zones designed for privacy, for collaborative work, and for core activities function together seamlessly, the Mirage family of pods are the product of such thinking.

Mirage uses high quality materials to create aesthetically pleasing modular pods for employees to work in. Their carefully crafted panels and coloured trim reflects the purpose of each pod and how it will be used. Subtle, tranquil hues enhance quiet contemplation, for example, while bright, vibrant shades help to create a stimulating workspace that facilitates increased creativity and productivity.

As well as helping you to reorganise your office in order to make best use of existing floorspace, Mirage Pods also help to provide noise control for energetic working environments. Slimline panels can reduce noise levels by up to 30 decibels, meaning that private spaces remain private, while the acoustics in shared spaces promote great communication.

# of Calm

## ACOUSTICS & FINISHES

Modern workspaces are essentially about people and are planned around their activities. The Mirage family of products has been designed to take this into consideration, providing the necessary tools to zone spaces into different types of environments for users, enabling core, collaborative or privacy zones to be designated within open planned areas.

Ergonomics and human interaction play a big part in Mirage design. Emphasis is placed on quality, with each panel carefully built to ensure refined detailing. Their comforting, textural upholstery is available in a selection of vibrant colours to stimulate and encourage productivity, whilst more subdued colours can be specified to promote calm and contemplative setting. Trims can coordinate or complement panel finishes, bringing accented hues that can help delineate function.

As space becomes more precious, noise can become a huge concern within agile working environments. Though slim-line in construction, Mirage can provide up to 30dB reduction in noise rating. This is perfect when wanting to contain sound; ensuring discretion within or when keeping sound out; promoting attention or relaxation.

A horizontal, irregular pink brushstroke with a textured, painterly appearance, serving as a background for the word 'GOBI'.

## STUDY POD

Single occupancy Gobi pods provide quiet work areas that allow users to focus on specific tasks in an environment that minimises distractions caused by external noise. These pods are cosy, ergonomically designed, and perfectly suited for their purpose. You have the option of selecting modules equipped for either permanently based equipment or mobile devices, or both, depending on your requirements. The most popular Gobi pods are of a two-tier height that works to create a protective cocoon around seated users. When standing, users are able to get a clear view of surrounding open plan areas. Gobi individual pods have a relatively small footprint, making them easy to place, and are also available in a slightly taller version, shaped like a phone booth, which has a roof plus perch points for users. These taller pods also have a useful integral light that is activated as the user approaches the booth.

# SONORAN

## WORK POD

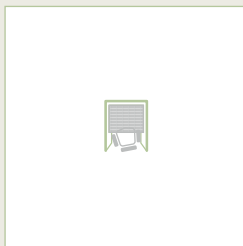

Sonoran pods are designed to provide private, separate workspaces that can be clustered together in different configurations. They are ideal for housing team members or workers who benefit from being geographically close together but who still want to occupy an individual unit. The integral work surfaces are generally straight rather than curved, giving the pods a streamlined appearance. You also have the option of adding service modules and cabling as required for permanently installed equipment, as well as for mobile devices. Configuring your Sonoran pods couldn't be easier. Select single-sided pods allow users to share walls or opt for a back-to-back layout if preferred. When clustered, these pods make the most of existing floor space, allowing you to provide workspace for a greater number of people per square metre. Sonoran pods are extremely efficient and cost effective, requiring fewer components.

# ATACAMA

## STUDY POD

If your workplace requires pod clusters that can function like hot desk stations, Atacama pods with shared components provide an ideal solution. Each pod has a triangular shape, which allows for the creation of a zigzag footprint when clustered with other Atacama pods, with each user being placed in the resultant zigzag corner. Work surfaces are designed to allow cabling to pass neatly through a cut-out space, and configured so that it's possible to mount flat screen monitors or place desk top service modules within easy reach of occupants. With smaller work surfaces than Sonoran pods, people are less likely to clutter up the tapered space with personal effects. Atacama is the ideal pod for workers who need everything to hand when they drop in for a short period of time before moving on. This is a highly efficient solution that maximises available space for a mobile workforce.

# SAHARA

## MEETING PODS

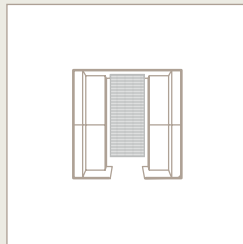

Shared workspaces need to be carefully structured to make the most of the available space, as well as enhance the type of activity taking place within them. Sahara pods are designed to create a multiple occupancy workspace that facilitates collaborative work in a quiet environment. Thanks to its acoustic dampening function, whether you want to create a quiet collaborative working space, free from distractions within an open plan area, or a room in which lively discussion can be contained, Sahara pods can do both. The flexibility of the Sahara system means you can choose from a range of larger pods with options for the number of tiers required. Single tiers can be used to delineate space, while units with additional tiers allow for increased privacy. To create shared service areas for printers and photocopiers, simply use Sahara to encircle equipment and deaden the sound.

# COLORADO

## MEETING POD

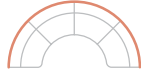

Colorado pods have gently curved walls, and are therefore ideal for creating layouts that are less angular and more fluid by design. Use of such aesthetics softens interior spaces, making them perfect environments for use as informal break-out areas, or as comfortable rooms in which to hold formal meetings and conference activities. As with Sahara pods, additional tiers can be added to Colorado units for privacy purposes, and there is also the option to choose whether you'd like the pod to have one or two entry points. This might depend, for example, on the level of access you need, as well as on what type of activities you plan for the pod. Furniture options include soft seating, suitable for informal activities, and dining or meeting and conference furniture for more formal events. You can structure Colorado pods exactly as you wish for specific activities, such as staff training sessions or briefings.

# KARAKUM

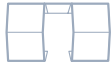

## MEETING POD

The Karakum range offers the perfect solution for housing small, private groups. The pod walls are three tiers high, above which can be found an integral roof. Pods suitable for occupancy by two, four or six occupants are available, in-line with your needs, as are units that include efficient LED lighting. Sensors for the lighting are triggered when Karakum is occupied, and will switch off when the pods are empty, ensuring optimal energy efficiency. Despite having a roof, the Karakum pod is designed to promote clean air circulation, helping users to stay focused and motivated. Selecting furniture from the options available will allow you to determine how the pod is to be used. Services can be routed from the floor upwards via the walls, as is the case with all Mirage pods, to feed adjacent or fixed work surfaces as well as suspended equipment such as monitors and projectors.

# FABRIC OPTIONS

Mirage Pods are offered in a myriad of fabric ranges supplied by one of the UK's leading manufacturers to ensure quality of upholstery and to provide specifiers with choice. Each option offers patterned weaves, subtle textures and a full palette of colour ways that can be used to enhance or contrast with the environments into which they are installed.

## Camira Cara Fabric Selection 1

One of our most popular vertical surface fabrics, Cara is a plain weave panel fabric used extensively on desk screens, wall-sides and on pin boards.

## Camira Carlow Fabric Selection 1

Carlow echoes the calm, gentle landscape of its Celtic namesake in rural Ireland. The fabric, like the county, invites you to escape into a place of tranquillity, discovering and exploring its hidden gems.

## Camira Blazer Lite Fabric Selection 2

Blazer Lite is a finer version of our Blazer upholstery fabric. The felted, milled finish sports a colour palette consisting of melange mixes and plain shades, as well as subtle pastels and iridescent brights.

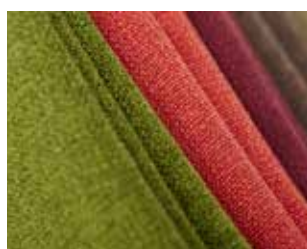

## Camira Racer Fabric Selection 2

Racer is a classic stretch knit product with a smooth macro cellular construction designed for use on vertical surfaces. Racer has multi-directional stretch for excellent upholstery-ability.

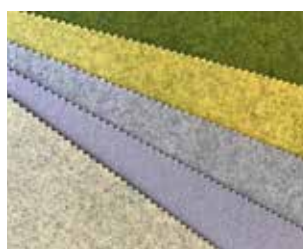

## Camira Synergy 170 Fabric Selection 3

Synergy 170, is the panel partner to our popular wool rich upholstery fabric Synergy, a soft handle wool blend fabric, featuring exquisite fibre dyed shades and sumptuous piece dyed solids.

## Camira Aspect Fabric Selection 4

Aspect is a subtle mélange, textured fabric with a warm soft handle, balancing superior flammability performance and a natural aesthetic.

## Camira Blazer Fabric Selection 4

Blazer is a classic pure new wool upholstery fabric with a billiard cloth felted finish. The fabric is made from premium New Zealand lambswool and benefits from complete integrity right from individual sheep farms to the finished fabric.

## Camira Canopy Fabric Selection 4

Canopy covers is a sumptuously soft chenille fabric construction. The fabric is dobby woven and piece dyed into carefully crafted shades, all with a delicate, ribbed surface which feels as smooth to touch as fresh spring leaves.

## Camira Patina Fabric Selection 4

Patina is designed with nature to achieve beauty with performance. The white flecks scattered across the surface are created by the flax content, just as the flowers would appear in the fields from which it is grown.

## Camira Synergy Fabric Selection 4

Say hello to Synergy, a soft handle wool blend fabric, featuring exquisite fibre dyed shades and sumptuous piece dyed solids.

## Camira X2 Fabric Selection 4

X2 provides stretch, flammability and abrasion performance in an unobtrusive background grey mélange effect. The subtle dark tones create texture and dimension within a playful colour palette of brights through to subtle neutrals.

# ACCESSORIES

As well as offering a selection of footprints and pod styles, Mirage can be dressed with optional fittings such as stationery trays, pen holders and service modules that finish an installation by placing everything within users' reach. It couldn't be simpler.
