PRODUCT DATA SPECIFICATION

GRESHAM

TAKE OFF LITE

PRODUCT DATA SPECIFICATION

Take Off Lite is a modular sofa system that can be used in reception or open plan spaces where users need a ‘time-out’.

Materials

The substructure is produced from a combination of softwood timber and wood-based sheet materials. This combines strength and stability whilst providing smooth ergonomic forms.

The frame is covered with CMHR (Combustion Modified High Resilience) Polyurethane foam for comfort and compliance with flammability requirements for contract use.

Upholstery fabrics for seat and back assemblies are available in a wide selection of patterns, colours & weaves, suitable for contract use in public areas.

Underframes are produced in laser-cut steel sections that are dressed and finished with an epoxy powder coating, no less than 50 microns thick.

Tables have matching frames but are produced from Melamine Faced Chipboard (MFC) with high impact resistant ABS edging.

Considerations

- Available with or without back rests.
- Can be used to delineate mid floor or perimeter space.
- Easily maintained upholstery and robust frame make models ideal for heavy traffic areas.
- Available with matching tables.

Environment
