VONA

AN INNOVATIVE, ENVIRONMENTALLY
FRIENDLY CHAIR MADE FROM
RECYCLED FELT, POLYPROPYLENE
BOTTLES AND NON-WOVEN TEXTILES

VONA

In keeping with our social responsibility, we introduce this sustainable chair design; a simple but unique chair made of recycled Felt (60% re-cycled PP bottles and 40% non-woven textile).

Vona is a conference chair that can be linked into compositions of various lengths or stored into vertical stacks.
The seat consists of ergonomic triangular plates allowing comfortable sitting by adapting to the body.

ONLY BY WORKING
STOP THE OCEAN DR

TOGETHER CAN WE
OWNING IN PLASTIC

WITH EVERY VONA CHAIR MADE, THERE ARE
APPROXIMATELY 70 PLASTIC BOTTLES SAVED
FROM POLLUTING THE ENVIRONMENT

Floating, toxic microplastics are often ingested by marine life, which in turn is ingested by us.

40% of Europe's plastics are only used once, then thrown away.

Plastics in the ocean kill marine mammals such as whales and dolphins, as well as seabirds.

More than 1,200 animal species are in danger from eating plastic or becoming tangled in it.

Plastic bottles are the third worst plastic polluter of the ocean.

Enough plastic is thrown away each year to circle the earth four times.

RESPONSIBLE DESIGN FOR SUSTAINABLE FURNITURE

Vona is a response to the human need to reduce our carbon imprint on the planet, and to rediscover waste as an industrial material of the future. Re-thinking a new philosophy of socially responsible, sustainable design, Vona is constructed with recycled Felt (60% re-cycled PP bottles and 40% non-woven textile).

The amount of waste in the form of PET bottles is increasing every year, and they can be recycled in different types of material. The use of waste in industrial materials of the future, is an important asset to reduce CO² emissions produced in different factory-made processes.

Using a process borrowed from the car industry, Vona is designed and produced with sustainable products made from waste materials. The goal was to use material that is considered 'rubbish' – felt made from recycled plastic bottles.

ONLY BY WORKING TOGETHER CAN WE
STOP THE OCEAN DROWNING IN PLASTIC
