PRODUCT DATA SPECIFICATION

GRESHAM

VONA

PRODUCT DATA SPECIFICATION

In keeping with our social responsibility, we introduce this sustainable chair design; a simple but unique chair made of recycled Felt.

Materials

Vona is made up of recycled felt, 60-70% (980g) recycled plastic bottles and 30-40% nonwoven textile.

3-4 layers of material are preheated and inserted into a mold and pressed to create a shape well known for it's strength.

Vona does not contain any glue or adhesives.

The shell is easily installed with nylon cable ties to a durable 10mm rod frame, and treated with a powder coated finish.

Considerations

- Upholstered seat pad only available in Gabriel Fame.
- Stackable up to 3 chairs high.

Technical Details

Model	LS34A
OA Height	840
OA Width	580
OA Depth	470
Seat Height	420
Net Weight	6kg
