

GRESHAM

RECTANGLE

PRODUCT DATA SPECIFICATION

GRESHAM

RECTANGLE

PRODUCT DATA SPECIFICATION

Rectangles are light-weight breakout seating modules that can easily be configured to form meandering shapes in open plan areas or around room perimeters.

Materials

The framework is produced from a combination of solid timber, and wood-based sheet materials.

These structures are covered with CMHR (Combustion Modified High Resilience) Polyurethane foam for comfort and compliance with flammability requirements for contract use.

Upholstery fabrics are available in a wide selection of patterns, colours & weaves, suitable for longevity in public areas.

Where table tops are included, these are produced from FSC certified Melamine Faced Chipboard (MFC) panels with 2mm high impact resistant ABS edging that has rounded corners and edges for comfortable use.

Considerations

- Two Tone Upholstery available
- Choice of feet
- Smooth upholstery lines helps to reduce ware when used.
