↔ OVERALL WIDTH: 1800MM

✦ OVERALL DEPTH: 800MM

## FEATURES

- All legs fitted with adjustable feet to accommodate uneven floors
- Selection of worksurface and leg finishes
- Tables available in dining (sit) and poseur (stand) height models
- Robust, stable construction for longevity of use

## MATERIALS

Our OP Panel tables feature robust 25mm thick melamine-faced chipboard tops, edged with 2mm impact-resistant ABS for long-lasting durability and a sleek finish.

Each worksurface is supported by a high-strength sub-frame constructed from 60mm x 30mm tubular steel sections. Die-cast aluminium joints and support elements ensure superior stability and rigidity, making this structure ideal for dynamic workspaces. Legs are seamlessly connected to the underframe and top via precision-engineered, pressed steel components, all finished in a hard-wearing black epoxy powder coat for a refined, resilient look.

The table legs are crafted from solid Ash and pre-fitted with threaded metal inserts, enabling secure metal-to-metal connections. This allows for multiple assembly and disassembly cycles without compromising structural integrity. All wood-based elements are professionally finished in natural oak, or black acid catalyst lacquer as standard, offering a versatile and premium aesthetic.
