## FEATURES

- Stacking (tablet version limited. Swivel version non-stacking)
- Available in a selection of frame colours
- Available in plastic or upholstered panel options
- Optional arms
- Optional writing tablets

## MATERIALS

Seat shells are produced in Polypropylene, combining flexibility with strength and durability. Upholstery seat pads are produced from Polypropylene that are covered with CMHR (Combustion Modified High Resilience) flexible Polyurethane foam for comfort and compliance to flammability requirements. These are upholstered in fabric which is available in a wide selection of colours, patterns and weaves.

Mesh backs have a Polyester fabric mesh that is encapsulated within a structural, glass-filled Polypropylene frame. Structural elements, such as frames are manufactured in steel. These are produced from tubular sections.
